Projects Worked on

- **Deep Admin(Frontend Application)**

Generic web scraping application for the oils and wells industry which can create, edit and start scrapping the data through form filling obtaining large amounts of data from these websites.

- **Keys and Responsibilities**

- We have implemented frontend, backend, and cloud services from concept through deployment.
- Standardized all output with a new, responsive, user-friendly approach and strategy.
- Assessed UX and UI designs for technical feasibility. Developed standard documentation of the web application as required.
- Collaborated with product team members to implement new feature developments.
- Handled client meetings and even hosted a client meeting on behalf of the front end for a project.

- **Key Achievements**

- Created an application that can scrape data from any website just by using the frontend end application without writing code for it.
